

KESHAV KRISHAN SHARMA

Targeting strategic leadership opportunities in full-stack development to drive product innovation, enterprise architecture, engineering excellence & AI-enabled software delivery for global organizations while bridging business vision with technology execution.

 keshavkrishansharmaofficial@gmail.com  +91-9911220507  linkedin.com/in/keshav-krishan

PROFILE SUMMARY

- Solutions Architect and Technical Lead** with **3 years** of experience in delivering enterprise-scale SaaS platforms, digital governance solutions, and multi-tenant applications **millions of records**.
- Expertise in **enterprise architecture, API-first development, RBAC, distributed systems, cloud-native applications, and scalable platform engineering**, transforming complex business requirements into robust technology solutions.
- Experienced in **AWS cloud architecture, DevOps, CI/CD automation, database optimization, and performance engineering**, ensuring scalable, resilient, and high-availability systems.
- Displayed skills to **lead and mentor engineering teams**, establish development standards, conduct architecture reviews, and align technology initiatives with business goals.
- Practitioner of **AI-Augmented Engineering**, leveraging LLMs, AI-assisted development, prompt engineering, and rapid prototyping to accelerate delivery while maintaining enterprise-grade quality standards.

CORE COMPETENCIES

Enterprise Solution Architecture	Technical Leadership & Team Management	Cloud Architecture & DevOps Automation
Multi-Tenant SaaS Platform Development	AI-Augmented Software Engineering	API-First & Microservices Architecture
System Design & Scalability Engineering	Product Strategy & Technology Roadmapping	Stakeholder & Cross-Functional Management

SOFT SKILLS

- Strategic Problem Solving
- Stakeholder Management
- Technical Leadership & Mentorship
- Cross-Functional Collaboration

TECHNICAL SKILLS PLEASE CONFIRM

- Programming Languages:** TypeScript, JavaScript, PHP
- Front-end Technologies:** React 19, Next.js, Vite, HTML5, CSS3, Tailwind CSS
- Back-end Technologies:** Node.js, Express.js, Yii2, Strapi CMS
- Databases:** MySQL, PostgreSQL, MongoDB, Redis
- Cloud & Infrastructure:** AWS EC2, AWS RDS, AWS S3, Docker
- DevOps & Version Control:** Git, GitHub, GitHub Actions, CI/CD
- AI & Development Tools:** GPT, Claude, Cursor AI, Claude Code
- Architecture & Methodologies:** REST APIs, Microservices, Agile, Scrum

AWARDS & ACCOLADES

- Outstanding Technical Contribution Award — Smarth eGov (Q2 2024)
- Winner — Inter-College Innovative Idea Competition
- Core Member — IEEE IDC (workshops for 200+ students)
- Technical Presenter — IIT Varanasi TechFest (GovTech)

CERTIFICATIONS

- UI/UX Design Intensive — Le Wagon
- CPD Certified Professional
- Digital Skills: UX — Accenture (FutureLearn)
- Graphic Design & UI/UX — Simplilearn Alumni
- PLEASE PROVIDE
- PLEASE PROVIDE

ACADEMIC DETAILS

- 2022: B.Tech. Computer Science & Engineering** from Krishna Engineering College, Ghaziabad (AKTU)

CAREER ACHIEVEMENTS PLEASE CONFIRM

- Designed and implemented scalable multi-tenant architecture, API-first frameworks, and dynamic configuration engines, improving platform extensibility by 70% while reducing new feature implementation effort by 50%.
- Led the development of automated approval, compliance, and affiliation management workflow that reduced processing turnaround times by 45%, enhanced operational efficiency and stakeholder experience.
- Engineered high-performance back-end services, database optimization strategies, and transactional workflow that improved application response times by 30% while supporting thousands of concurrent users.
- Leveraged AI-assisted development, reusable component libraries, and automated engineering practices to accelerate feature delivery by 40%, while mentoring 4+ engineers and maintaining enterprise-grade quality, security, and governance standards.

WORK EXPERIENCE

July 2023 – Present: Smarth eGov × Ministry of Education	- Managing the architecture and delivery of multi-tenant SaaS platforms supporting 100+ universities and 5,000+ institutions, enabling governance, compliance, affiliation management, and institutional operations at scale. - Leading end-to-end solution design across React, Next.js, TypeScript, Yii2, Node.js, and AWS, developing API-first architectures, RBAC frameworks, dynamic configuration engines, and secure tenant-isolated environments. - Partnering with stakeholders, regulatory bodies, and engineering teams to transform complex business requirements into scalable workflow, approval systems, audit frameworks, analytics solutions, and enterprise applications. - Driving engineering excellence through AI-augmented development, DevOps automation, CI/CD, architecture governance, team mentoring, and cloud optimization, ensuring scalable, resilient, and high-performing platforms.
Software Developer C	

INTERNSHIP

- 2022: Smarth eGov | Programmer Intern (Back-end Engineering)**
Refer to Annexure on Next Page for Projects

PERSONAL DETAILS

Date of Birth: XX | Languages Known: English, Hindi, XX | Address: Ghaziabad, India

Annexure (Projects)

MPDD — Material Production & Distribution Platform | Solutions Architect

- Architected a multi-tenant inventory and distribution platform, designing configurable data models, dynamic metadata-driven workflow, enterprise RBAC, bulk-processing capabilities, and reusable UI frameworks that accelerated platform scalability while minimizing future development effort.

Affiliation Management & Compliance Hub | Sole Architect

- Independently designed and delivered a national-scale affiliation and compliance platform supporting **100+ university regulatory frameworks and 2M+ records**, implemented rule-driven automation, audit governance, and approval workflow that reduced processing turnaround time by **45%**.

Estate Management & Resource Allocation System | Sole Architect

- Engineered an enterprise resource allocation and asset management solution with automated conflict detection, workflow orchestration, and centralized asset visibility, reduced institutional resource allocation cycles by **60%** and improved operational efficiency.

eHousing — Accommodation & Allotment Module | Sole Architect

- Built a full-stack accommodation and allotment management platform streamlining resident onboarding, room allocation, occupancy tracking, and administrative operations through configurable workflow, RBAC controls, and centralized records management.

e-Registration SaaS Platform | Technical Architect

- Designed and launched an API-first multi-tenant admissions platform leveraging Strapi CMS, Next.js, JWT authentication, and tenant-isolated architecture, enabled **150+ colleges** to manage end-to-end registration and admission processes at scale.
